

GEIA Annual Conference - Sept 2004
The “Right Stuff” , in the “Right Place”, at the “Right Time”

Bills of Information

A Data Management

GENERAL DYNAMICS
C4 Systems

GEIA
GOVERNMENT ELECTRONICS AND INFORMATION TECHNOLOGY ASSOCIATION
A Sector of the Electronic Industries Alliance 

Bills of Information

- Definition
 - What does that really mean?
 - How will that help DM?
- Composition (classes of data)
 - Administrative
 - Contractual
 - Technical
 - Financial

Bills of Information

- Contents – relationships/views
 - Enterprise data
 - Management data
 - Functional data
 - Product data
- Practical use
- Bill of Information Examples

BOI Definition:

- “The bill of information consists of all the information and relationships to completely document the entire life cycle of a product – including the associated project information (administrative, contractual, technical, and financial data) and it’s location.”

GEIA-859

What does that really mean?

- All data/information used to:
 - Propose
 - Plan
 - Develop/procure
 - Manufacture/build
 - Test
 - Deliver
 - Maintain a work product throughout the life cycle (fielding and maintenance)
 - Disposition

What does that really mean?

- Not entirely new concept
- Implementation is sketchy and patchy
- Pockets of excellence – Bills of material
- Expand the BOI to include all information
- Start small and build

How does that help DM?

- EIA-859 has changing focus –
 - Moving from traditional DM
 - Contractual data
 - CDRLs/SDRLs
 - Moving to enterprise DM
 - Manage all data for enterprise
 - See tutorials and presentations on EIA-859 given by Joe Roman and Jim VanDyke

Composition – types of data

- Administrative data - Examples
 - Work authorizations
 - Management plans
 - Budgets
 - Schedules
 - Meeting minutes
 - Project
 - Integrated Product Teams
 - Program Reviews
 - Review agendas and minutes

Composition – types of data

- Contractual data – Examples
 - Contract and contract mods
 - Statement of objectives/work
 - Data Requirements list (DD1423s)
 - Data Item Requirements/Description (DID)
 - Data item submittal/transmittal info
 - Customer comments
 - Comments to suppliers

Composition - types of data

- Technical data - Examples
 - Product requirements
 - Product design
 - Product specification
 - Testing documentation (plan, procedure, reports)
 - Technical and scientific manuals/reports
 - Modeling and simulation inputs/outputs

Composition - types of data

■ Financial data - Examples

- Cost performance reports

- Annual reports

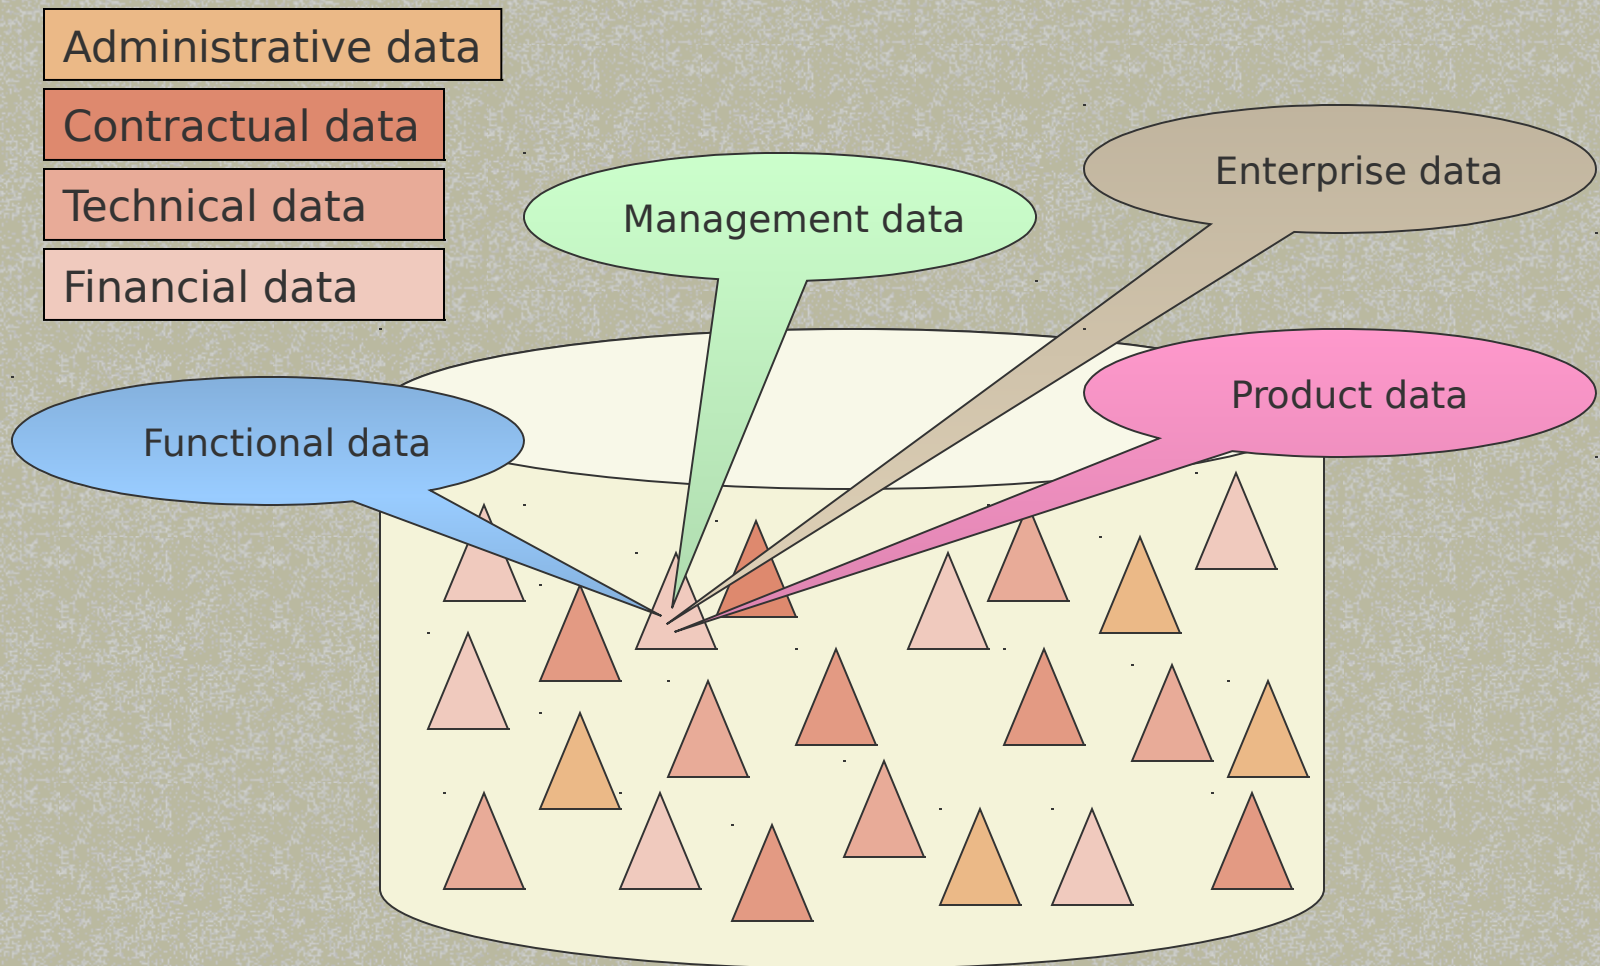

- Return on Investment data

- ???? - if you see this,

I have to kill you

Composition vs. Content

Content – relationships/views

- Enterprise data
 - Business Policy and Process data
 - Operating Manuals
 - Standard Operating Instructions
 - Organizational data
 - Human Resources data

Content – relationships/views

- Management data
 - Risk Management data
 - Metric data
 - Customer satisfaction data
 - Personnel data
 - Proposal data
 - Cost data

Content – relationships/views

- Functional data
 - Metric data
 - Manpower data
 - Audit data
 - Historical cost data
 - Data/records retention data
 - Templates and forms data

Content – relationships/views

- Product data
 - Tailored project planning
 - Bills of material data
 - License agreement data
 - Vendor data
 - CSA data – build, deliver, maintain
 - Release Management data
 - Audit data

Practical Use

- How do we use and structure data?
 - Based on enterprise structure and tools
 - Expandable for business context
 - Index data
 - Relationship driven
 - Multiple uses for data
 - View based on need to know
 - Access managed
 - IP classification
 - Use and need
 - Physical data
 - Repository for physical files

PDM Tools

**PDM Tools are the
only tools that can be
used
to build an effective BOI.
Why?**

PDM Tools

- Provide repository / storage
 - Types of files
 - Ability to integrate design tools - examples
 - Catia
 - Autocad
 - ProE
 - Word
 - Excel

PDM Tools

- Provide indexing capability
 - Capture relationships
 - Document to document
 - Document to part
 - Part to part
 - Capture multiple level structures
 - Multiple uses
 - Multiple views

PDM Tools

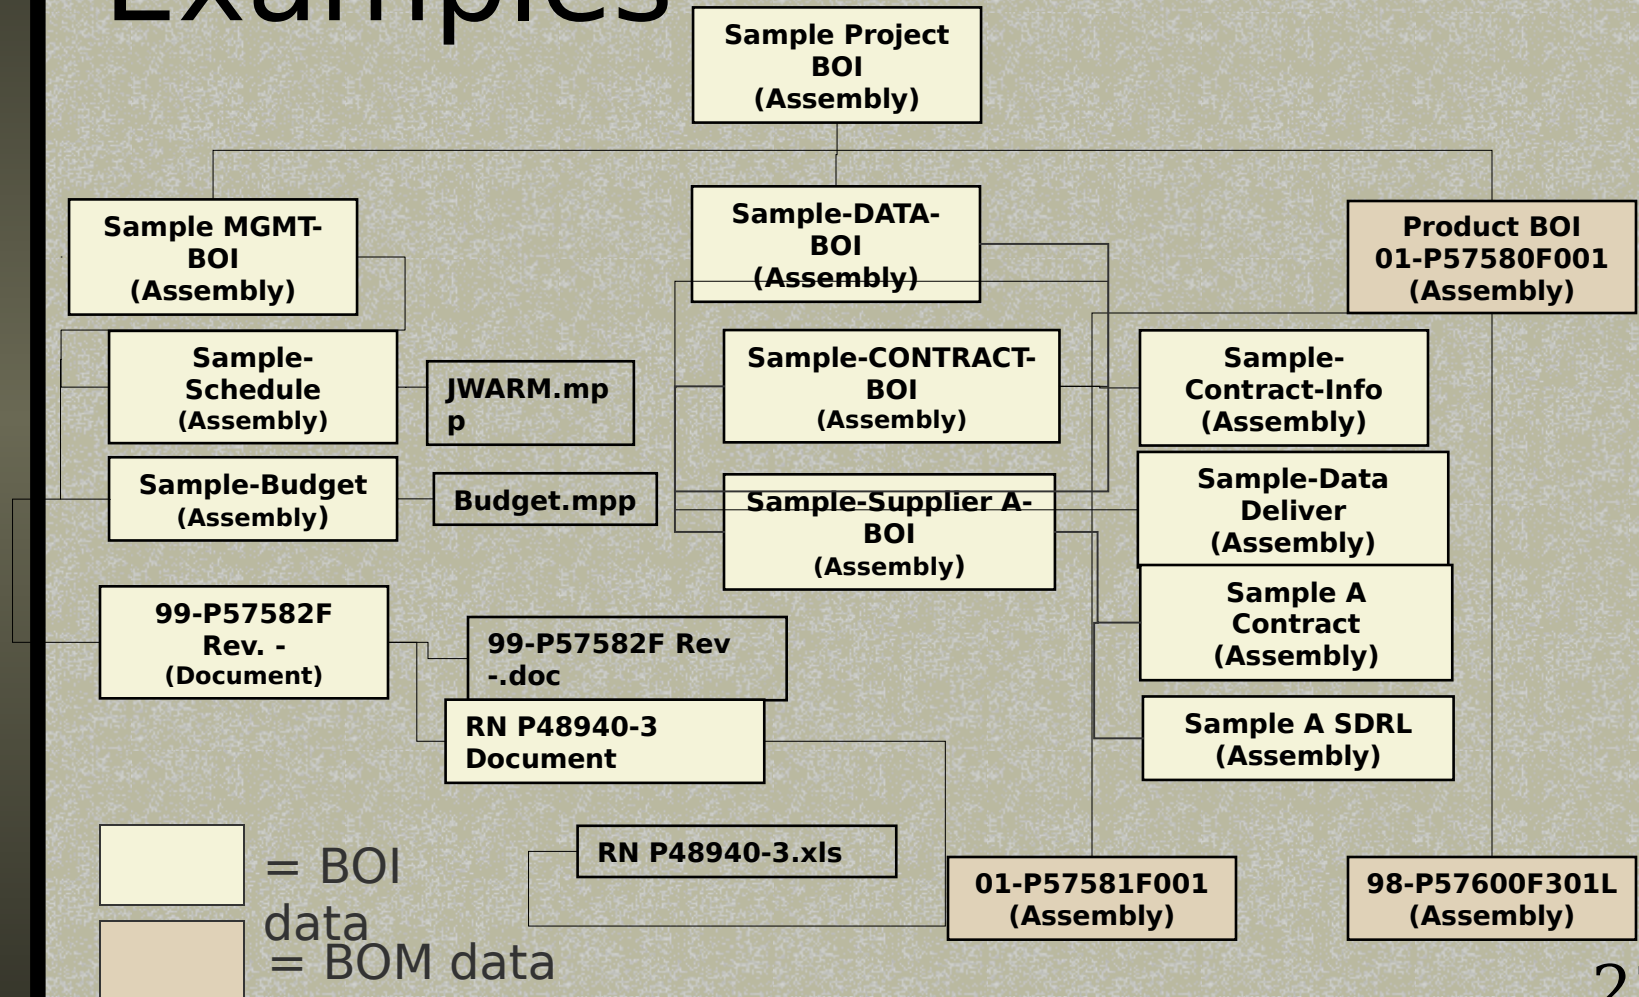

- Provide access controls
 - Approvals for access
 - Project lead approval
 - Project administrator
 - Division administrator
 - Responsibilities
 - Citizenship
 - Employment status
 - Contract requirements and need to know
 - Security clearance level

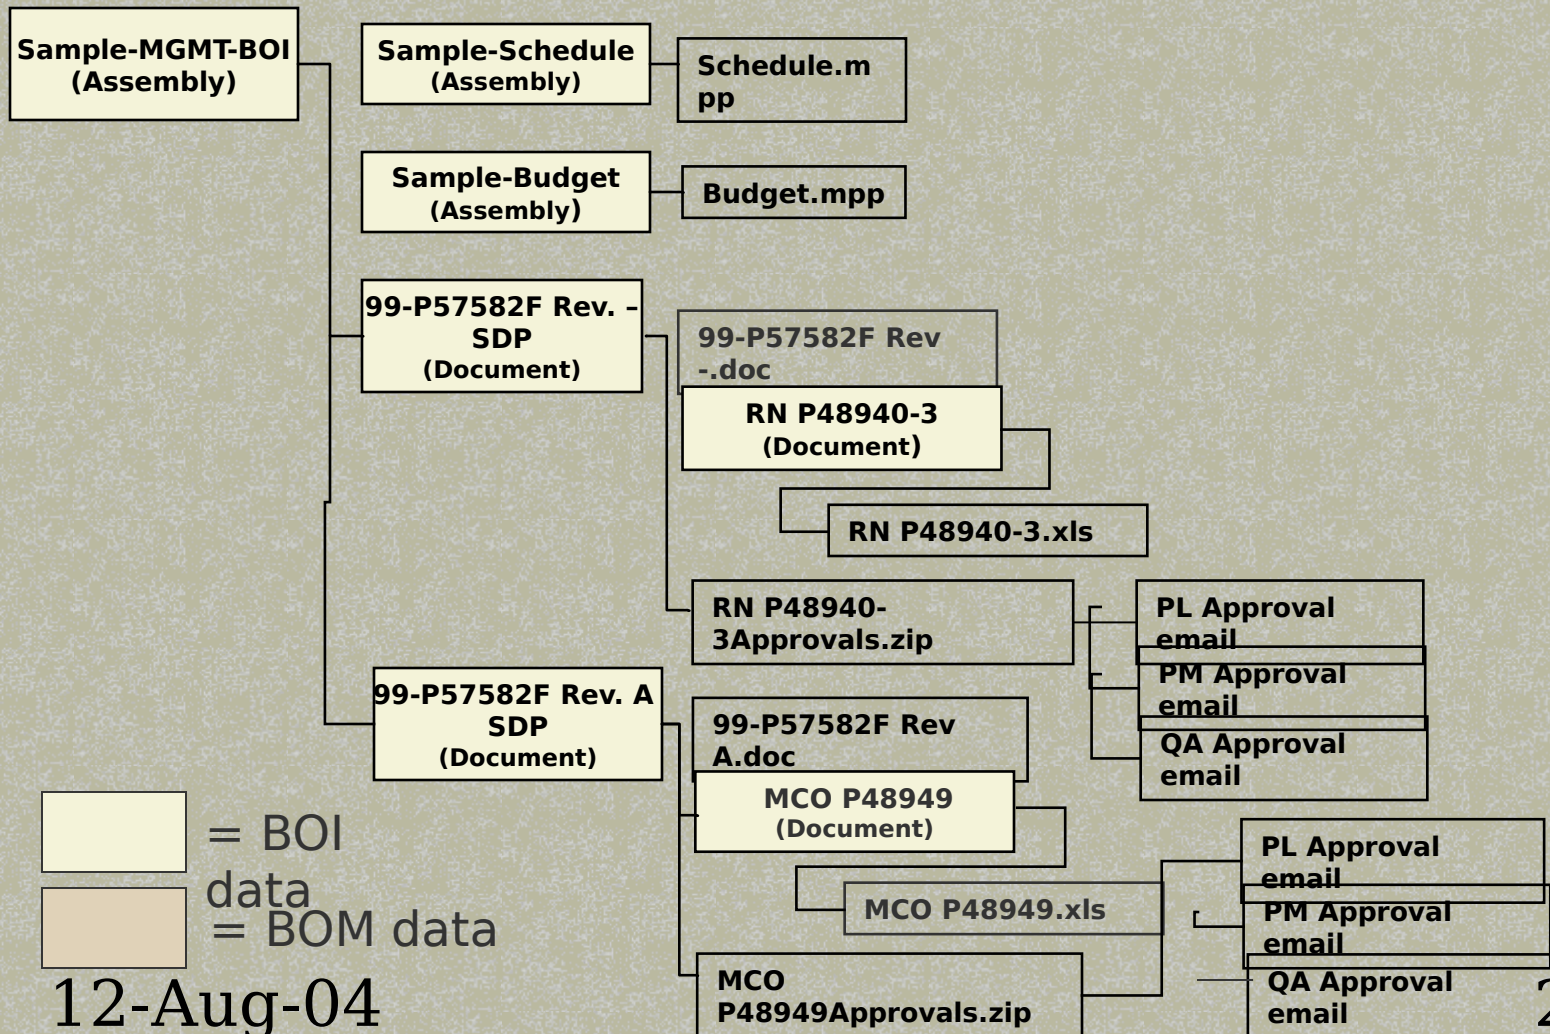

Bill of Information Examples

- Sample project structure
 - Management BOI
 - Data BOI
 - Contract data
 - Supplier data
 - Product BOI
 - Hardware
 - Software
 - Supplier data

Bill of Information Examples

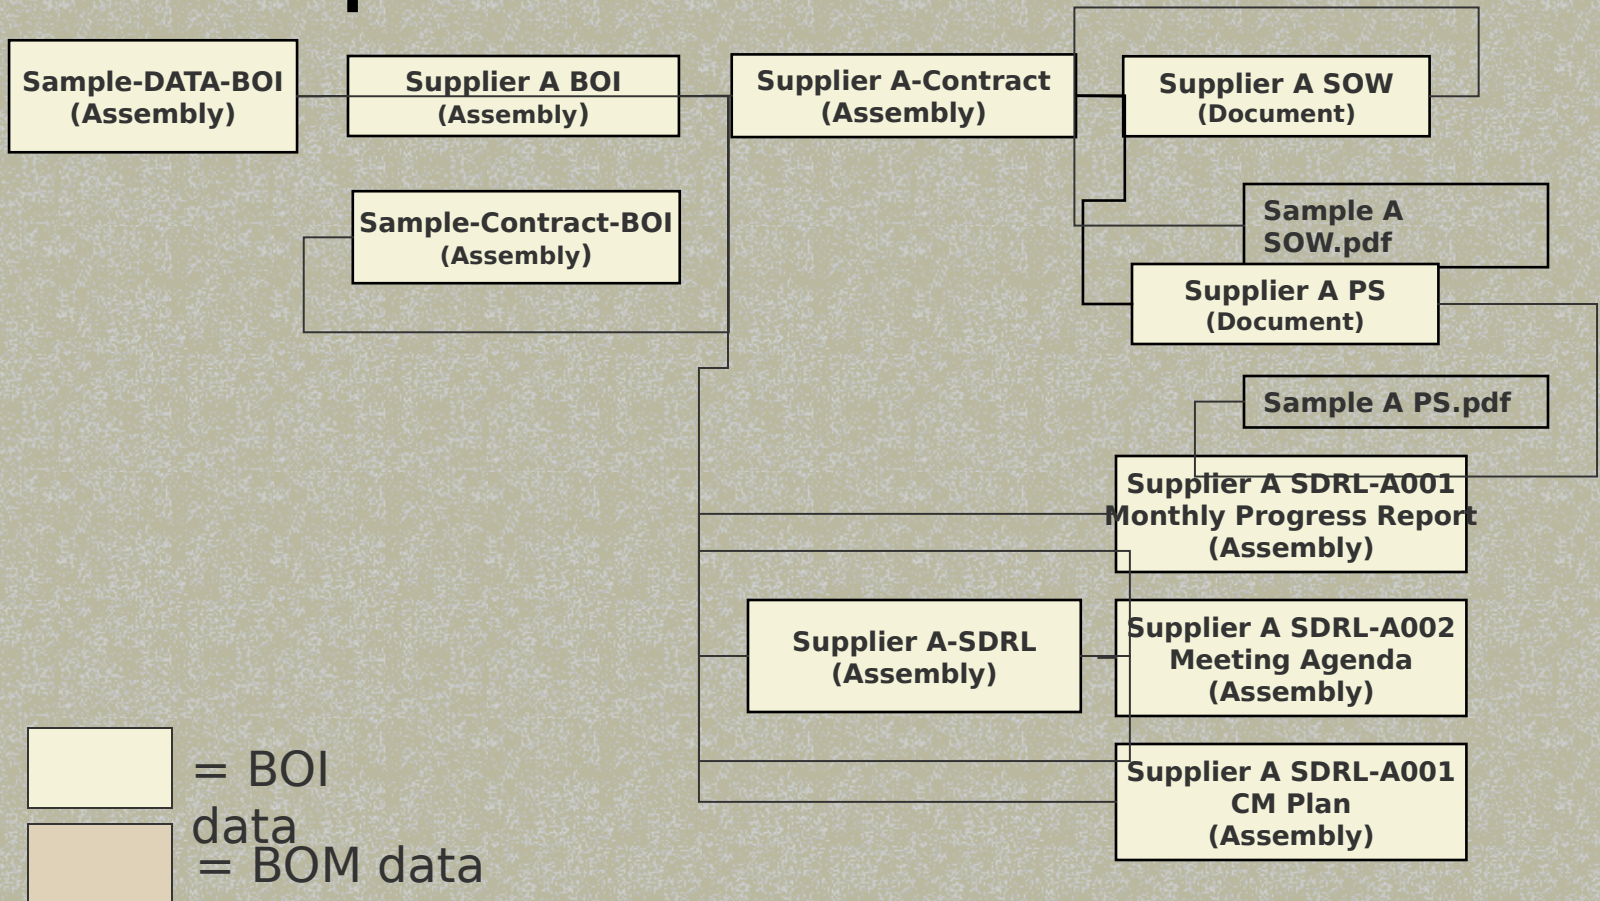

Management BOI Example

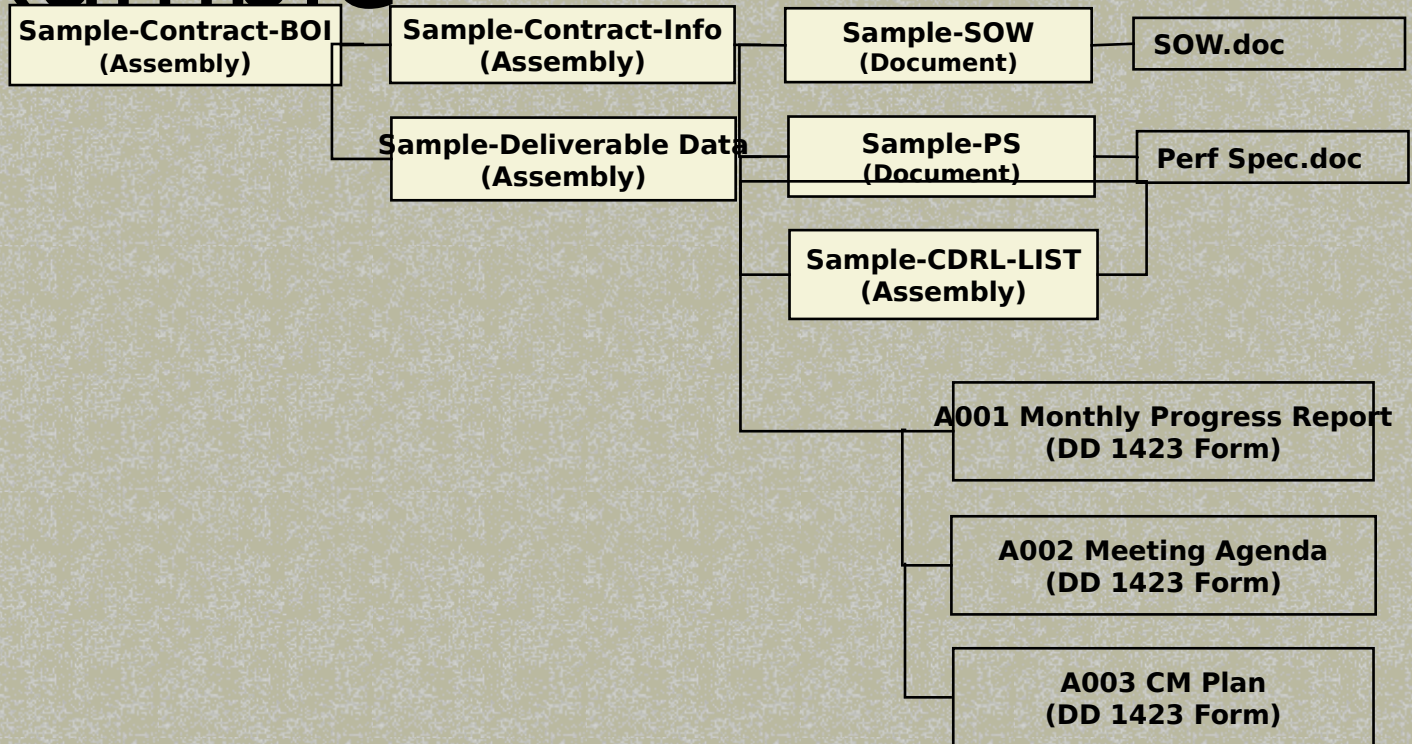

Data BOI - Supplier Example

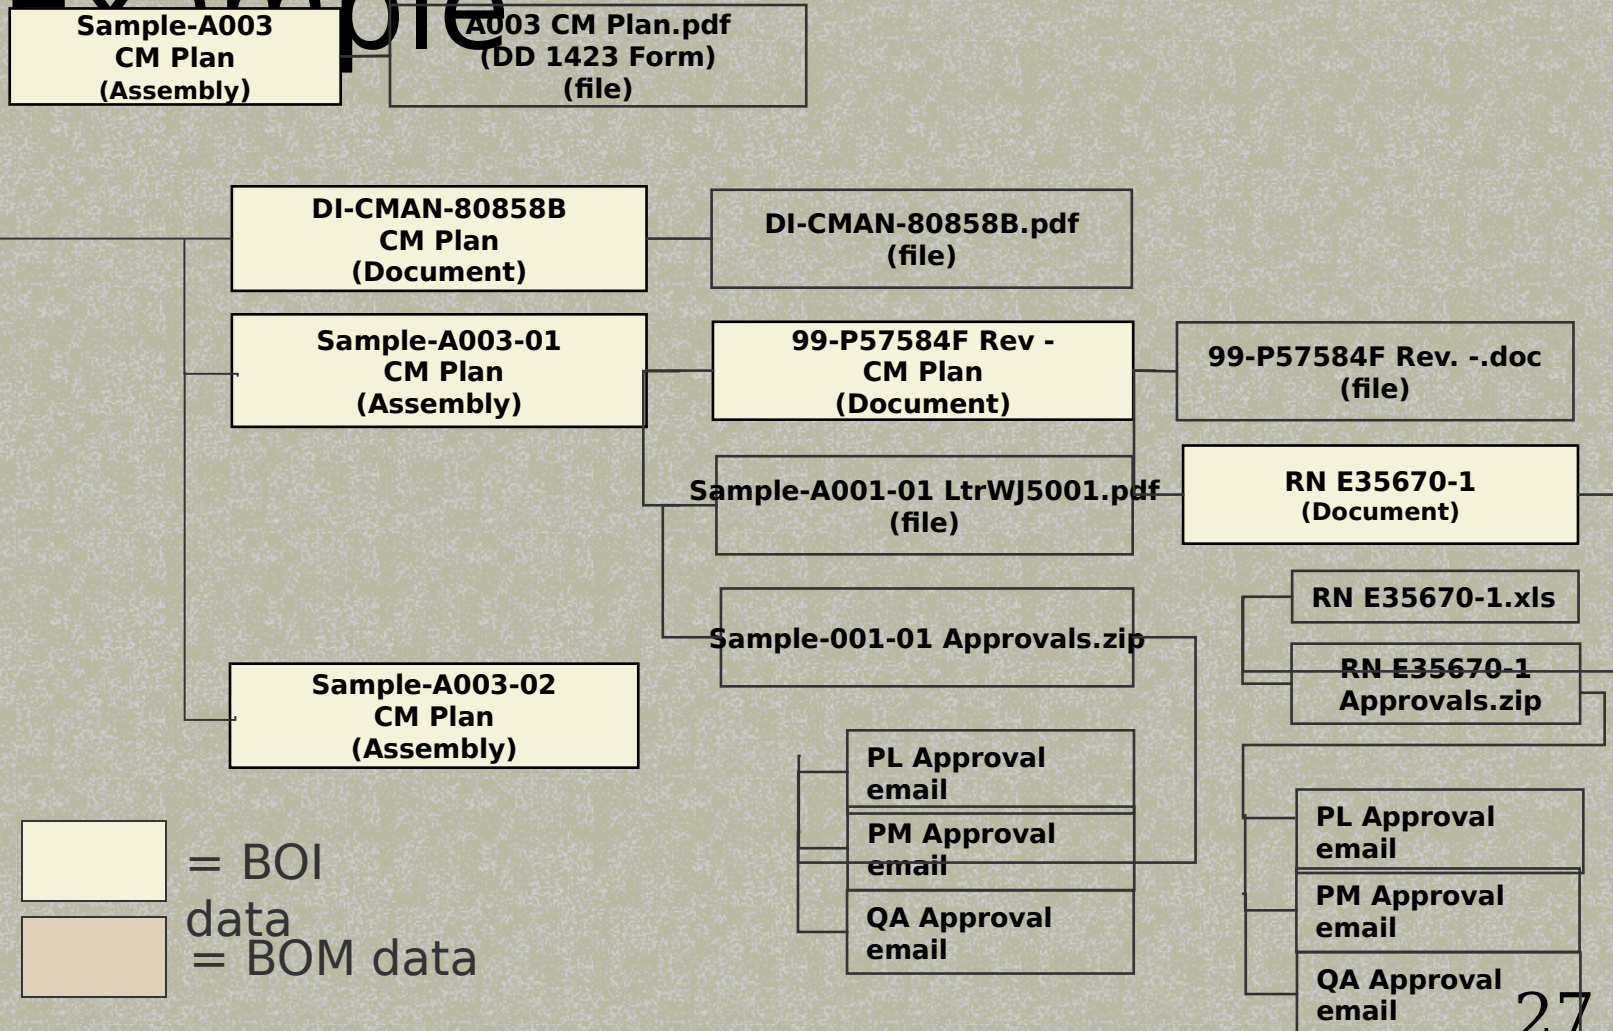

12-Aug-04

Data BOI - Contract Example

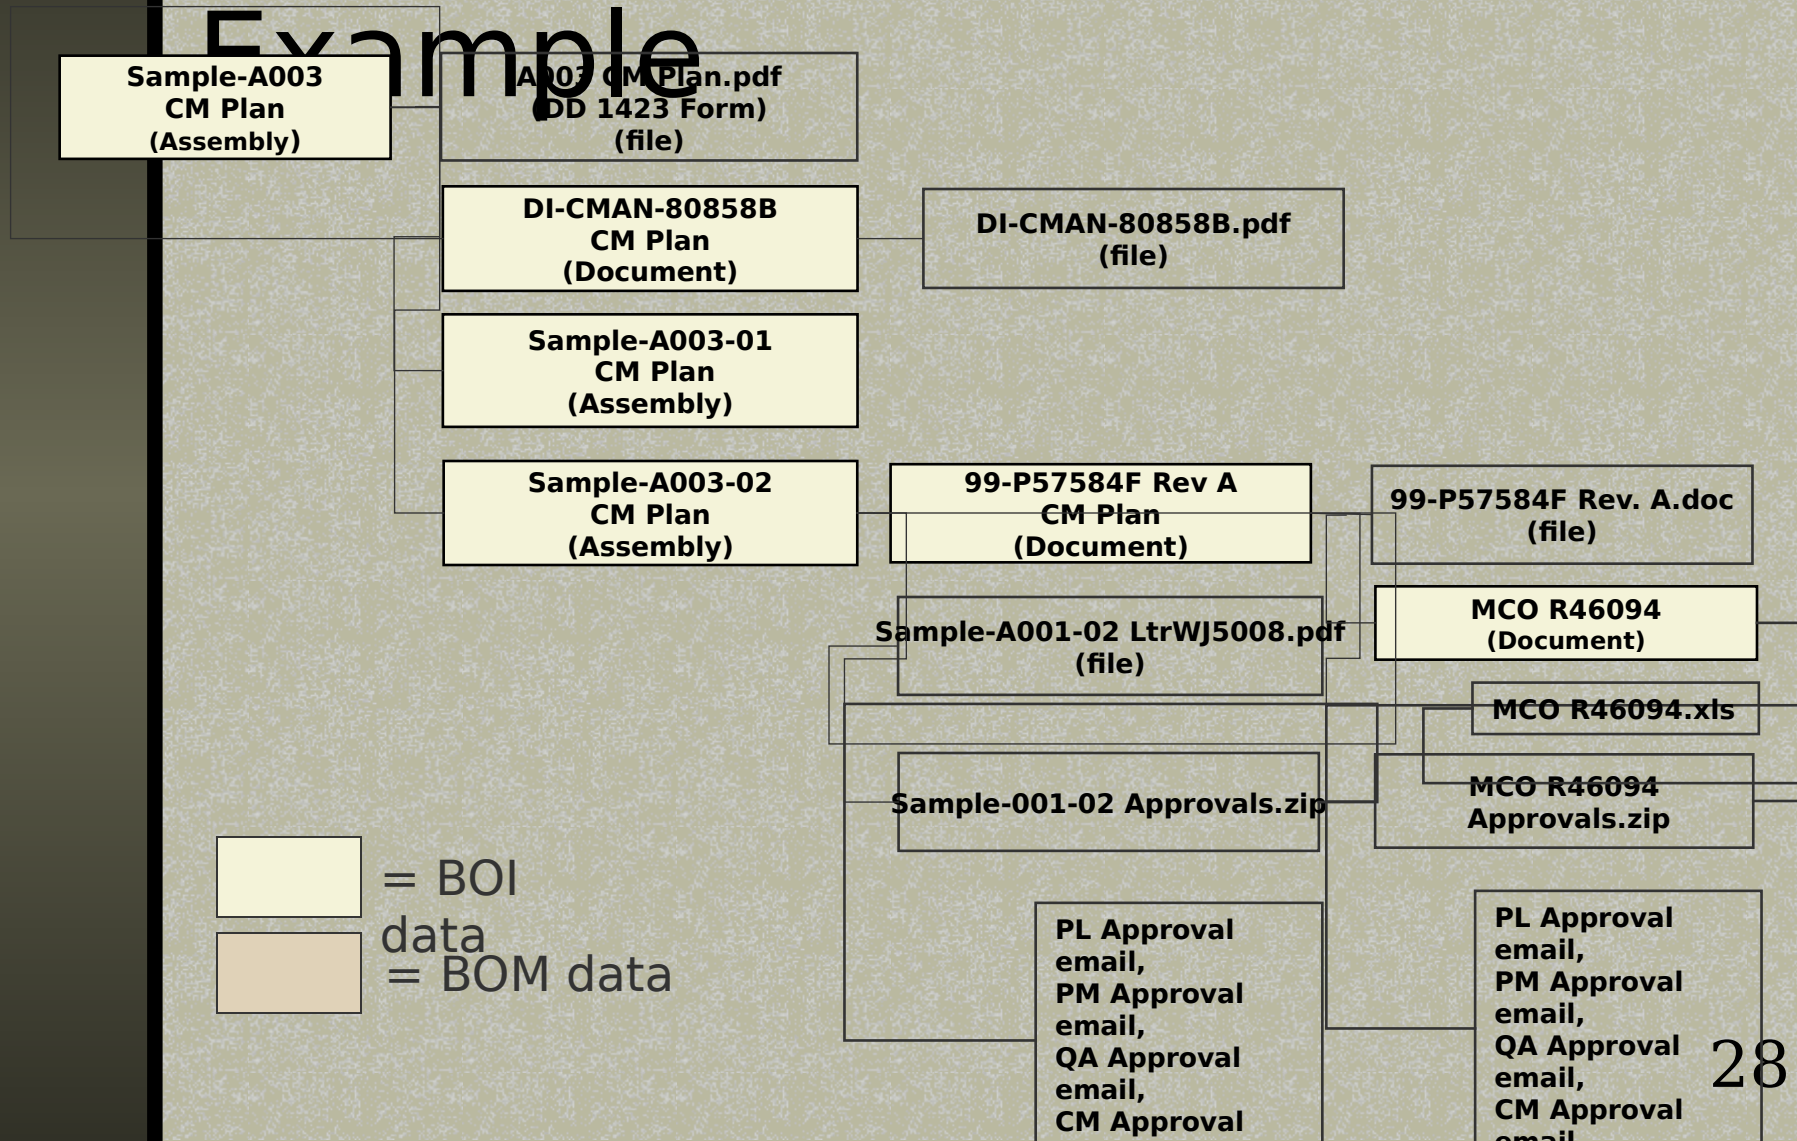

Data BOI - Submittal

Example

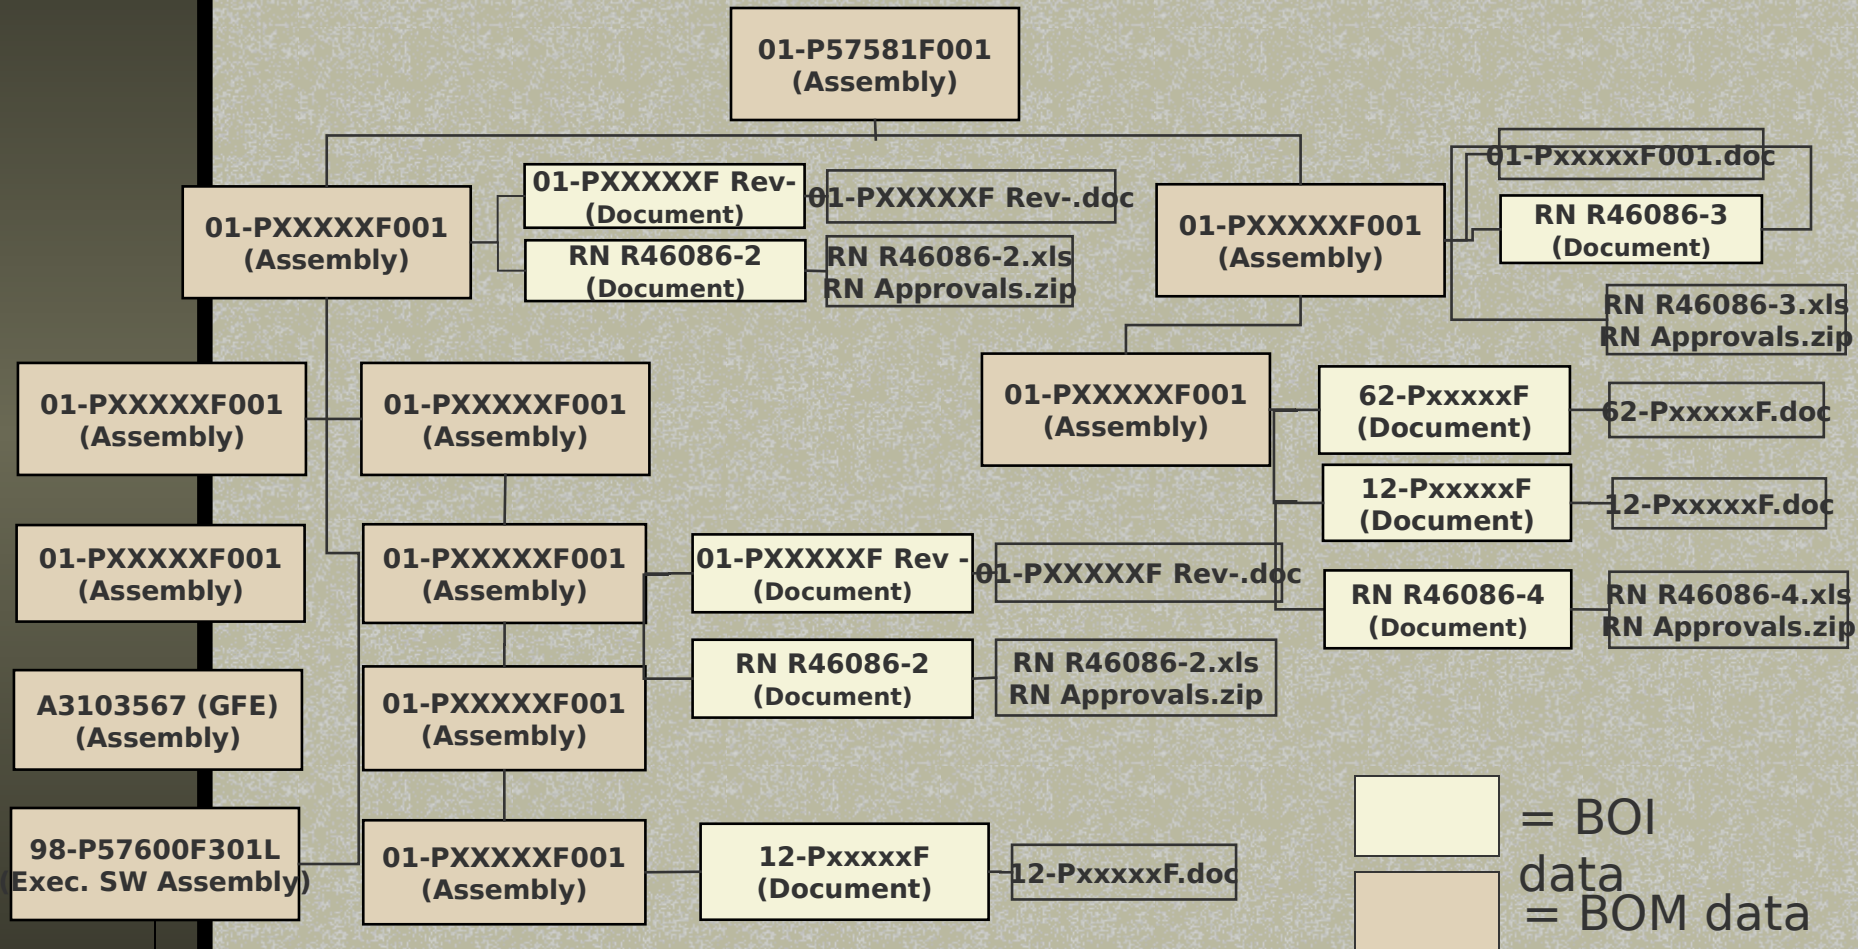

Data BOI - Revision

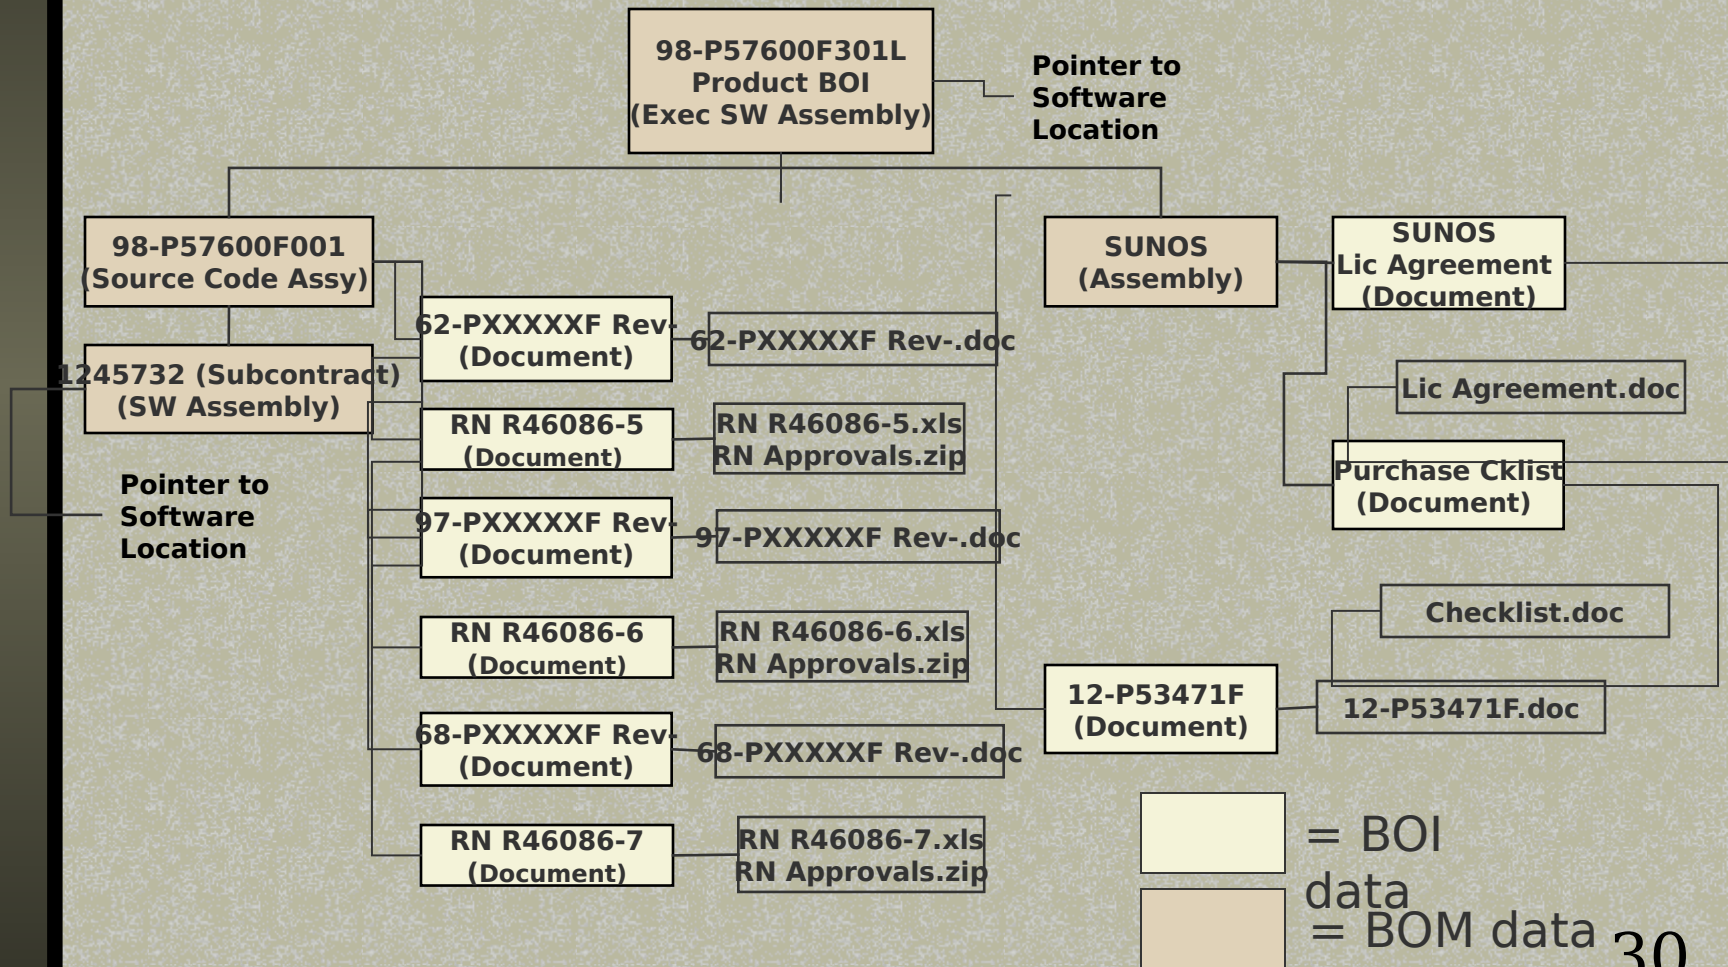

Example

Product BOI - Hardware

Product BOI - Software

Bills of Information

Get out there and brew some DM
12-Aug-04 Magic!!!
